CONSTRUCTION & CHASSIS SPECIFICATIONS
LIKE A FINE HOME, Mountain Aire is framed 16 inches on center, allowing the best placement of outlets, switches and other components. Newmar uses only Sikaflex elastic adhesive throughout Mountain Aire’s construction – one of the strongest bonding agents available. It seals against air and water and helps dampen sound and vibration. Electrical wiring holes in Mountain Aire's aluminum frame are ringed with plastic grommets to protect wires from chafing. And Newmar’s Total Comfort™ Central Air is two separate, fully ducted systems that distribute cool air and remove warm air.

According to Newmar president Matthew Miller, “Customers say they’re loyal to us because they trust us to stand behind our products – from support, parts and service to paying our warranties. It feels good to own a coach that has all of that behind it.”

How do we sustain this high level of service? At Newmar, there’s a Miller way of doing things. These principles guide us every day. Courtesy. Integrity. And reliability. So when you buy from Newmar, you know that every single person who touches your coach or talks with you has your back. Period.

Matthew Miller, Newmar President, lifelong motor coach enthusiast.
