NEWMAR TOTAL COMFORT<sup>TM</sup> Central Air Conditioning Experience RV air conditioning just like that found in site-built homes. Newmar's Total Comfort Central Air Conditioning is actually two separate, fully ducted systems: one to distribute incoming cool air, the other to quickly and effectively remove warm air from every living area.

PROTECTED C-CHANNELS To keep the electrical wiring that runs through holes in the aluminum-frame C-channels from chafing, each hole is ringed with a plastic grommet.

#### SIKAFLEX<sup>®</sup>

Used throughout Newmar construction, Sikaflex elastic adhesive is one of the strongest bonding agents on the market today. It also serves as a sealant against air and water. And it helps dampen both sound and vibration.

#### 16" ON-CENTER FRAMING

Just like a fine site-built residential home, your Newmar home is framed 16 inches on center, which allows the best placement of outlets, switches and other components.
