Begin your tour of America’s great outdoors with a trip through the doors of Newmar in Nappanee, Indiana. You’re invited to tour our plant weekdays 10 a.m. and 2 p.m. E.S.T. and learn firsthand how a Newmar RV, which embodies the principles of design innovation, old-world craftsmanship and uncompromising quality control, results in a world-class product.

You’ll see how an RV is designed and built by people who are themselves experienced RVers. Their sole purpose, one they'll be glad to explain personally, is to ensure that your RV is as durable and dependable years down the road as it is the day it leaves Nappanee. You can’t miss us, we’re just off U.S. 6 west of town. We’ll be looking forward to seeing you and welcoming you inside a company that is setting standards and initiating trends throughout the industry – Newmar Corporation.

- Cabinetry, Oak w/Raised Panel Cathedral Doors
The patented automatic door stop retracts when the entry door is closed. It is standard on all London Aires.

The sliding L.P. tank tray is a valuable feature because it effortlessly brings the bottles to you. You don't have to bend over and reach inside a dark compartment and fumble with the valves or fittings to change tanks.

If you ever had to fight finding easy access to your generator in conventional fifth-wheels, you can really appreciate what London Aire offers as an alternative. This sliding generator rack makes generator maintenance a breeze.

Heavy-duty 16-inch wheels and oversized brakes let you tow in comfort and safety. All London Aire units have 12-1/4" x 3-3/8" brakes to produce a much larger braking area that will handle the load and give you peace of mind.

No space is wasted as is demonstrated here with these large available storage compartments that may be located behind the sofa and are accessible through the exterior slideout wall. Belongings are weather-proofed, too. And speaking of slideouts, our new "Synchronized Quiet Slide," rack-and-pinion power slideout mechanism offers stronger, faster, smoother operation than ever before.

Standard features like the front fifth-wheel stabilizers (which store in the lower front wrap of the cabover), the roll-down stone guard and the effortless power jack with convenient snap pins are what set London Aire apart from all the rest.

The power window awning, molded-in roof ladder and sliding bumper tray for spare tire and sewer hose are exclusive features that are standard on London Aire.
This delightful living area in the travel trailer is a work of art, from the rich blend of fabrics and hardwoods to the eye appeal and convenience of the entertainment center. Newmar’s unchallenged talent for quality and elegance shines again in the Mountain Aire towables for 1994.

That classic Newmar look holds true in this Mountain Aire travel trailer. Large radiused corners provide better aerodynamics and better tracking.
The spacious bedroom is laid out to allow you to move around the bed. Plenty of overhead, wardrobe and drawer storage helps to keep it tidy and affords all the comforts of home.
Storage space is a priority with RVers and Newmar realized this. That is why every vacant area is practically put to use like this large pantry in the galley.

The Magic Bed™ serves two important functions. During the day, it is a comfortable sofa, at night it converts to a firm, supporting bed for one or two.

Beveled, etched mirrors with brass frame are accent features of Mountain Aire, with locations varying according to floor plan.
The large slideouts available with Mountain Aire make the living area, kitchen and dining areas as roomy and open as a domestic home. Smart interior design and practical use of space lend themselves to this stately look. Top it all off with residential style furnishings and name brand contemporary appliances and you can see why Mountain Aire is becoming so popular.
Another fine cousin in the Aire family of towables is the Mountain Aire. This mid-priced, all-aluminum construction RV maintains Newmar’s quality of excellence. Large radiused corners and its own distinct exterior color graphics make the Mountain Aire a handsome addition to the Aire Family.

High R-factor ratings along with well-planned engineering enable this line of towables to provide comfort in virtually all climates. Ample storage space inside and out and a variety of popular floor plans and options enable you to tailor a Mountain Aire fifth-wheel or travel trailer to your own needs.
That classic, inviting look that is so familiar to the Kountry Aire name just keeps getting better every year. The warmth of solid oak and brass greet you as you step into this roomy galley. Hardwood provides durability as well as elegance and will perform and still look great years from now.

This upper Lazy Susan cabinet helps keep food items organized and within easy reach.

The lower cabinet revolving shelf is also a great organizer for cleaning supplies and both the upper and lower Lazy Susans help keep stored items in place when traveling.

The sliding drawer dividers should be in every home, not just in RVs. Another great idea from Newmar to end the clutter and confusion inherent with silverware drawers.
The stacking washer and dryer are a convenience no one wants to be without. Note the solid oak doors with the built-in louvers for proper ventilation.

Every area of the Kountry Aire fifth-wheel is carefully planned and thought out. The practical use of space in this entertainment center keeps everything you need conveniently located in one place, yet displaces very little space from the room.

The ever popular free-standing dinette and chairs is always a popular feature and now provides an optional folding hidden leaf for even more room and versatility.
Kountry Aire fifth-wheels (shown above) are your home away from home. Not only does our professional interior designer richly appoint every coach, but our engineers are busy at the same time making sure you’re comfortable in any climate you visit.

The large 17-foot slideout comes into play here and adds a new dimension in space and versatility. Rich oak and plush fabrics merge to give that “Kountry Style” that is Kountry Aire’s trademark.
Kountry Aire is the name Newmar Corporation was founded on and is the flagship of the fleet. Kountry Aire is the best known “full timers” RV because of its consistent reliability, quality and is the first choice of return customers. Every coach is built blending Old World Craftsmanship with Today’s Technology.

If you add up all the advantages with Kountry Aire, it’s easy to see why “full timers” keep returning. Large spacious slideouts, the finest materials and components, all climate comfort and beauty found only in the high-end range RVs combine to produce the finest line of towables in their class.
Considerations like the residential side-by-side refrigerator combined with ample cabinet and counter space make this London Aire galley the envy of homemakers and RVers. Everything is at your fingertips and includes extras like the popular full length pantry, built-in microwave oven, Corian counter top, hi-rise faucet and optional dishwasher.

Note the contour roof line on the slideout. This design looks better inside and out. Newmar's exclusive self-sealing weather stripping around the entire slideout housing insures dry, draft-free comfort all year round.
Privacy and comfort marry with ceramic tile floors, Corian lavatory tops and brass fixtures to make even the bath a showroom.

Whether formal or casual, the free-standing dinette in the slideout provides the setting, added space and versatility to accommodate both needs in elegance.
High expectations are synonymous with the London Aire name, and that holds true with every room and detail in the coach. These bedrooms rival the most exquisite hotels. Comfort, convenience and space are the focus.

Practical use of space in an eye pleasing setting sums up the built in vanity in the bedroom. Again, the luscious cherry hardwood adds an inviting warmth.
Our slideouts don’t look like an afterthought as with so many others. The new hardwood surround gives the domestic feel of hardwood with carved fretwork and blends with the rest of the decor.

The recliner and other residential style furniture is standard equipment in London Aire fifth-wheels.
The dark richness of hand selected cherry hardwood in the planked flooring, cabinetry and domestic furnishings greets you in the London Aire fifth-wheel. We offer five interior color packages to blend your taste with the rich elegance of the wood.

Our spacious slideouts are engineered with a durable, compact and quiet mechanism that is simple to use. These slideouts are designed to match the roof line of the coach rather than squared off parallel to the floor as with most RV slideouts. This not only enhances the looks, but provides the area with more head room. Newmar’s passion for quality and luxury is displayed in the London Aire.
Incomparably luxurious, spacious and sleek best describe the ultimate London Aires by “the experts in fifth-wheels”, Newmar Corporation. These premier recreational vehicles are the best of the best... the Cadillac of the industry. Not only do London Aire fifth-wheels encompass every possible luxury and convenience available to the serious RVer, but they are packaged in a sleek and virtually maintenance-free exterior.

The London Aire reputation for quality and elegance doesn’t stop with the interiors. These coaches tow and handle like a dream and incorporate an impressive list of exterior standard features unmatched by our competitors. Add to this the limited lifetime warranty and incredibly high Refactor ratings and it’s easy to understand why London Aire fifth-wheels were named the “best buy” in 1992 by Consumer Digest.

Newmar Corporation invites you to tour our full line of fine recreational vehicles throughout our brochures. The innovations you’ll see will explain our progressive way of doing business. With 26 years of experience, we’ve managed to perfect slideouts, including the first major motorhome slideouts. We have pioneered the Honeymoon Suite, the power awning, the roll up stone guard, the sliding bumper tray, an efficient central air system and the list goes on and on.

When we refer to Old World Craftsmanship blended with Today’s Technology, we’re implying literally that with all the advanced and contemporary concepts we’ve created, Newmar employees still maintain those old world ways in quality and craftsmanship. These fine products are designed and built by RVers for RVers. We know those needs and expectations of our customers because not only do we design, build and sell RVs, we also use them. If it’s comfort, elegance and reliability you’re shopping for, look no further...Newmar Corporation has the perfect RV for your needs and budget.

Limited Lifetime Warranty

Newmar Corporation warrants the Superstructure which includes the following: the 16” I-beam frame, the aluminum framing in the sidewalls and roof. If any part of the Superstructure fails to perform properly because of faulty workmanship or materials supplied by Newmar during the ownership of the original buyer, it will be repaired without charge for either parts or labor by Newmar providing the proper claim procedures are followed. All other items excluding the Superstructure are covered under the standard Newmar 1 Year Limited Warranty. See Owner’s Manual for details.

Kountry Aire, Mountain Aire — 5 Year Limited Warranty on Superstructure

Newmar Corporation warrants the Superstructure which includes the following: the 12” I-beam frame, the aluminum framing in the sidewalls and roof. If any part of the Superstructure fails to perform properly within 5 years from the date of purchase because of faulty workmanship or materials supplied by Newmar during the ownership of the original buyer, it will be repaired without charge for either parts or labor by Newmar providing the proper claim procedures are followed. All other items excluding the Superstructure are covered under the standard Newmar 1 Year Limited Warranty. See Owner’s Manual for details.
