Newmar Corporation

Uncompromising work standards, ethics and service are only part of what Newmar's world-class quality is all about. An unending passion for this recreation combined with professionals who are experienced RVers themselves, work together to produce distinctive, dependable and durable products that will serve you for many years in a variety of climates. Comfort and convenience go hand-in-hand with any Newmar Product.

Our conviction to satisfy our customers is unchallenged and our aim is to maintain the highest standards in quality and customer service in the industry. A nationwide dealer network is out there ready to serve you and is backed by the Newmar commitment. We are so dedicated to these philosophies that we personally invite you to visit our plant in Nappanee, Indiana (just off U.S. 6 west of town). Tours are offered weekdays at 10 a.m. and 2 p.m. E.S.T. We want our customers to see how we do things firsthand. We want to meet you and extend a welcome into the world of recreational vehicles from a company that sets the trends and standards for the industry . . . Newmar Corporation.

- State Seal
- Waste Basket & Convenience Light in Kitchen
- Window Treatments Day/Night Soft Shades, Lambskins
- Window Treatments Mini Blinds (kitchen & bath)
- Window Treatments Mini Blinds (throughout)
In light of all the so-called "luxury, high-end coaches" available out there, the Kountry Star Class A shown here with the large slideout has all the grandeur of these, but with a much more attractive price tag. The optional rich parquet floor adds luster to this spacious and exquisitely designed coach. The selective use of quality hardwoods and fabrics paralleled with top name components and appliances yields an environment that is not only inviting, but offers all the elements needed to enjoy RVing in complete comfort.

The privacy, comfort and dual purpose of the Hide-a-Bed speaks for itself. Handy pleated shades in the cockpit area plus the residential-style horizontal day/night shades on the remaining windows locks out the outside when you want privacy.
This delightful, affordable minihome from Dutch Star was created for those small weekender families and sport enthusiasts. It's a nice substitute for vans because you have cooking, sleeping, storage and bathroom capabilities not possible with the van. Extended trips are also a joy because of the ease of handling.

The highlight of the Star line this year is the Kountry Star Diesel Pusher. It has all the features and options available on our front engine motorhomes. Pushers provide more power for better handling, quieter interiors and more living and storage space than our conventional Class A. These full-scale coaches run from 32' to 40' and are powered by Cummins 190, 250 and 300 horsepower diesel engines.

The shortest pusher offered is the 32'. This unit has a Spartan EC 2000 series chassis, a 190 hp Cummins engine and the Allison AT 542 transmission. At the top end of this spectrum are the 40' pushers. They are powered by a Cummins 300 hp diesel with the Allison World MD 3060 electronic shift transmission and ride on the premium Spartan Mountain Master Series chassis. For midrange diesel motorhomes, Kountry Star Pushers yield all the power and ease of operation available in their price range. Add to this a wheelbase of 276-inches, fresh water capacity of approximately 115 gallons and a gross vehicle weight rating of 28,000 pounds, and you have a formidable luxury dwelling on wheels. Great for the long haul!
The 1993 lineup of Star motorhomes is better than ever this year. From the entry-level Dutch Star minihomes and Class A motorhomes to the elegant Kountry Star Pusher, Newmar offers a motorhome to fit your budget and needs. Regular motorhomes are radically different from towables. Not only because they are self-contained with their own power, but also because of their size and space limitations when using a chassis versus a frame.

It's no surprise that Newmar overcame many of these barriers with a proven ability for innovative engineering that works in the field. Having pioneered the only motorhomes with slideouts, these Stars provide so much living area that it is difficult to believe you're in a motorhome. Whether you're in the minihome market for the small group or family, or a live-in full scale Class A or diesel pusher, the preeminence of space, convenience and comfort hold true and are the hallmarks of Newmar's reputation.

The classic Newmar style is evident in this Dutch Star Class A. If you're traveling to a ball game, driving on extended trips, or docked for the night in your favorite camping area, this coach will comfortably handle your needs. There are plenty of overhead cabinets, abundant room for cooking, sitting and sleeping in luxury not common to an entry-level coach such as this, and most Star motorhomes come equipped with the popular Hide-a-Bed feature. New for 1993, the space enhancing slideout feature previously available only in the larger Newmar motorhomes is now available on some smaller floor plans.
The sleek exterior styling on the London Aire Diesel Pusher is very attractive. The molded-in, aerodynamic contours of the lower wrap, bumpers and fenders create good ground effects for better handling, and yet give the London Aire a luxury sport appearance.

You can quickly put a hand on everything you need whether on the road or in the campsite with these large, slideout storage trays. They function smoothly and make loading and unloading a breeze. The compartments, when closed, are weatherproof to protect your belongings, too.

Calculated with fiberglass exterior sidewall

The molded-in ladder is not only more eye appealing, but is much stronger and safer than externally mounted ladders. Newmar also incorporates a discreet, yet very functional step pocket in the bumper for ease of climbing.
Say goodnight and retire in complete comfort and style in this typical London Aire Class A bedroom. All the comforts of home are built into every London Aire we manufacture and the bedrooms are no exception. Pleasant dreams!

“Newmar has a reputation for being an innovator when it comes to RV design... You can always expect to see something rather spectacular from this company.”

Don Magary
Family Motor Coaching
No words can describe the new London Aire Diesel Pusher other than full-scale elegance. Bathe yourself in luxury as you tour the living area pictured above and on the cover. This is Newmar's finest and we're certainly proud of it. Every piece of fabric, leather, wood, brass, glass, appliances and components (and the list goes on) are hand selected and diligently inspected before they are allowed to be a part of this motorhome. Matched grain cherry hardwood in the cabinetry and the new planked flooring give this coach an ambiance of warmth, brilliance, and distinction.

Details like brass fixtures and pulls, beveled plate glass mirrors, etched and leaded glass, Corian countertops, and ceramic tile bathroom floors with roomy, corner tubs all play a role in making the London Aire Class A Diesel Pusher the most beautiful and best valued motorhomes available in the high end market. The huge slideout, up to 14' long, creates so much more room in the living area, that you have to look for the cockpit as a reminder that you're inside a motorhome.
The London Aire Pusher comes in two popular lengths, 38- and 40-foot-long, with either the side aisle or walk through bath floor plans offered in either length. These units are built to handle the steepest mountain terrain in absolute comfort, with ease of handling and power to spare. The 38' model has a 252-inch wheelbase while the 40' coach delivers a full 275-inch wheelbase. Both motorhomes come standard with the 300 horsepower Cummins diesel engine, an Allison World MD 3060 electronic shift transmission and the specially ordered premium Spartan Mountain Master chassis.

With 26,000 pound gross vehicle weight rating, it's easy to understand why these coaches are gaining in popularity with RVers who travel extensively. When you have a unit with built-in capacities as mentioned, your time on the road without needless stops is greatly increased along with the pleasure of driving an RV that's designed for this type of travel. The London Aire Diesel Pusher is just one more part of Newmar's absolute dedication to RVers everywhere.

A kitchen area like this one in the London Aire Pusher is usually seen only on the cover of residential style magazines, but thanks to Newmar's exquisite taste and experienced engineers, it's available to our customers on wheels. It's a well-lit, spacious galley with contemporary appliances, hardwood cherry cabinets and planked floor, Corian countertop and large domestic style side-by-side refrigerator. Imagine yourself preparing a gourmet meal for your guests in this richly appointed setting.

This ingenious automatic coffee maker is an important convenience. It puts your work at eye-level and frees your countertops for other important items. Another Newmar distinctive feature.

Food items aren't this organized in most homes. This pullout pantry feature makes very resourceful use of valuable space. When unexpected friends drop by and you're in a flurry to prepare snacks or meals, the pullout pantry puts everything at your fingertips.
This Kountry Aire Class A bedroom is a vehicle for the designer’s art. Carefully chosen and matched fabrics compliment the warm complexion of the cherry cabinetry. Brass lamps and beveled mirrors add an impact of quality. The lambrequins lend a stately, yet homely touch to this classical Newmar product. The built-in nightstands are very handy for clocks, water glasses, nighttime reading materials, medicines or incidentals. Matching bedspread and pillow shams on a queen size bed top off this charming room.

The rear spoiler with recessed backup/floodlights are standard on the Kountry Aire Class A.

For those who prefer the minihome over the larger Class A type motorhomes, Kountry Aire still offers you one of the finest and most luxurious in the industry today. These units incorporate the same high grade fabrics, materials and appliances as their bigger cousins, only in a scaled down version. The same attention is paid to space, storage and comfort and the mini maintains that classic Kountry Aire quality and look.

The Mountain Aire Class A originated as a medium-priced high-end unit in between the Kountry Star and the Kountry Aire. This price bracket gives our customers an opportunity to step up into the exclusive family of fine Aire quality and standard features without the full high-end price tag. Mountain Aire has its own distinct look via the exterior color graphics package and many of the standard features available in Kountry Aire. Newmar tries to fill all the needs of its customers, and the Mountain Aire is another fine product used in achieving this goal.
The Aire motorhomes for 1993 are more spectacular than ever before. There are three brands to choose from, Mountain Aire, a moderately priced high-end product, the ever-popular Kountry Aire and the exclusively luxurious London Aire Diesel Pusher. The variety of styles, chassis, engines and floor plans to choose from make shopping for motorhomes at a Newmar dealership a one-stop shop. The Aires are a complete line of motorized products from minihomes to conventional front engine to diesel pusher Class As.

Unmatched beauty, quality and dependability are what this line was founded on, and 1993 is no exception to these convictions. One look at the Kountry Aire 37 WDSK living area above, and you’ll understand what all the excitement is about. Newmar is the innovator of the “Motorhome Slideout,” and that one facet alone enables these units to stand out beyond the rest. Available luscious cherry hardwoods, painstakingly designed and professionally coordinated interiors and space, space, space, make these coaches unique in this industry. No one knows slideouts like Newmar, and no one puts them to more practical and functional use.
About the cover ... The London Aire Diesel Pusher is full-scale elegance.

Newmar Corporation has been helping America relax in style for 25 years. Our tradition of elegance began when the first Kountry Aire was designed in 1967. Since then, we’ve grown from tipouts to slideouts, from one brand to six, and from manufacturing only towables to producing Minihomes, Class A’s and Diesel Pushers as well as Travel Trailers and Fifth-Wheels.

As our life has changed over a quarter century, so has America ... in 25 years, our nation has grown from households with one TV set (often black and white) to full-blown color screens complete with VCR’s and satellite dishes. We’ve watched a man walk on the moon. Technology has advanced to the point that computers have become household mainstays. And our lives have become so fast-paced that we’ve replaced personal banking with automatic teller machines, and homemade chicken soup with microwave boiling bags.

At Newmar, we’ve used technology to the fullest. Our innovations, such as perfecting the large slideout, have earned us industry-wide recognition as a manufacturer delivering the highest standards in the RV industry.

And while it’s important to us to stay on the cutting edge of technology, some things at Newmar will always stay the same. Things like our traditions of elegance, comfort and quality. Newmar still constructs each recreational vehicle with the old-world craftsmanship and attention to detail that has become our hallmark.

At Newmar, we’re proud of the past 25 years and our sincere dedication to our customers. As we celebrate, we intend to keep serving you and providing you with the best products possible. Afterall, you’re the reason we’re in the business.

---

Don’t forget to check out the Klub ... the Newmar Kountry Klub, that is. All you need to be eligible is to be the proud owner of any one of the fine Newmar recreational vehicles.
